—THE—

Illinois Woman's Alliance.

To the People of Chicago:

In order to convince the indifferent and incredulous public that the demands of the Alliance for more school buildings are justifiable, and are warranted by the deplorable condition of school matters, the undersigned have obtained from the records of the Board of Education the exact number of school sittings owned and rented by the city according to the report of the principals sent in June, 1892, also the exact number of children in the city between the ages of 6 and 14 years.

These we have classified according to the wards of the city so that the comparison between the number of children of school age and the school sittings provided for them may be in available shape to present for consideration to the representatives of the people, the Common Council.

As the number of pupils under 14 years attending the High Schools is more than balanced by the number over 14 attending the District Schools, it was deemed unnecessary to include the High Schools in this report.

The figures of the accompanying table tell a story of unpardonable neglect and unfaithfulness on the part of previous Boards of Education and City Councils. They explain why the compulsory law has never been enforced—children cannot be driven into schools which have no existence. They explain how it is that stores, factories and shops find so many surplus children ready to work for contemptibly small wages. They explain the presence of so many young boys at the Bridewell. They warn us of the army of ignorant men and women who will fill the city in the near future.

The table shows that there are but nine wards in which the school sittings exceed the number of children, and these are the wards where the wealthy live. It shows that in each of the 9th

F896C
IL

and 14th wards the children exceed the school sittings by over 4,500; in the 19th and in the 30th by over 4,900; in the 15th by over 5,000, and in the 16th by 7,331. The total excess of children between 6 and 14 years in the city over the school sittings provided for them is 59,878, and remembering that many of the seats are occupied by children over 14 years, it will be safe to put the number at 60,000.

It is also apparent that the city rents 7,000 seats, or the equivalent of seven schools with a capacity of 1,000 seats each. When it is remembered that the school appropriations have been generous, this looks like bad management rather than poverty.

There are 356 half-day divisions, or about 14,340 pupils who are receiving but two-and-a-half hour's instruction per day.

Upon calling the attention of the members of the Board to these figures, we were told that we had not taken into account the private and parochial schools. It is our opinion that those schools should not be considered by the Board. Their business is to provide public schools, furnished with the newest and most effective aids to education, for all the children of the city, irrespective of the schools built as private enterprises. Experience has shown that wherever the public schools have been sufficient in number that private ones have only flourished spasmodically. The question of private schools does not concern the Alliance; we insist upon public schools being furnished for all the children of the community.

We also call to your notice the fact that no provision has been made for the 10,000 children who will be 6 years old by the opening of the next school year, September, 1893.

In conclusion, we wish to emphasize the number of school buildings needed. Allowing that each building should contain 1,000 seats, we find:

- 1st. The 7,000 rented rooms equal..... 7 Schools.
- 2d. The 356 half-day divisions means that there are
178 divisions which should be in 12 "
- 3d. To accommodate the 60,000 surplus Children..... 60 "
- 4th. To accommodate those who will be 6 by Sept., '93 10 "

Total..... 89 Schools.

Respectfully submitted,

CORINNE S. BROWN,
FLORENCE KELLEY.
